

Personas

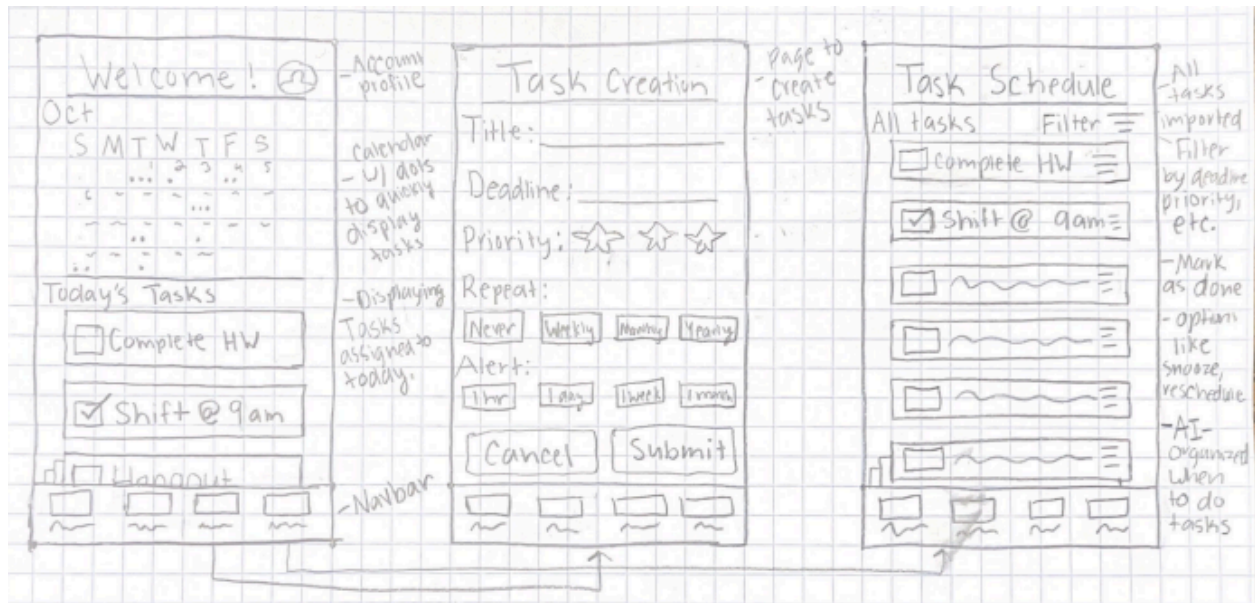

1. **Emma**
 - A junior balancing a part-time job with coursework.
 - Needs a system to track assignments and shifts.
 2. **Jason**
 - A senior preparing for graduate school applications.
 - Struggles with managing deadlines for applications and assignments.
 3. **Sophia**
 - A freshman adjusting to the academic workload and social life.
 - Wants to maintain friendships but avoid academic procrastination.
-

Scenarios

1. **Emma's Scenario**
 - Uses the app to organize weekly work shifts and class assignments.
 - Receives a reminder about a shift and uploads a completed project on time.
 2. **Jason's Scenario**
 - Sets up reminders for multiple graduate applications.
 - Balances these deadlines with coursework, using calendar notifications.
 3. **Sophia's Scenario**
 - Plans social events using the calendar feature without overlapping with study sessions.
 - Uses the checklist feature to break larger assignments into smaller tasks.
-

Storyboards

1. **Emma's Storyboard**
 1. Emma opens the time management app.
 2. She inputs her work shifts and assignments.
 3. The app notifies her of an upcoming shift.
 4. She finishes her project on time using the to-do list feature.
2. **Jason's Storyboard**
 1. Jason opens the app and checks the deadline calendar.
 2. He adds graduate application deadlines.
 3. The app alerts him about an approaching application deadline.
 4. Jason finishes his coursework on time thanks to notifications.
3. **Sophia's Storyboard**
 1. Sophia schedules study sessions and hangouts using the calendar.
 2. The app shows her which days are free for social events.
 3. She uses the to-do list to break an essay into smaller tasks.
 4. She finishes her assignment without procrastinating and attends her event.

Sketch 1:

The homepage depicts a calendar with dots representing the number of tasks on each day. Additionally, it highlights tasks specific to the current day.

Sketch 2:

This is a task creation screen where users can create new tasks to organize. It includes title, deadline, priority by star system, repeat, and alerts.

Sketch 3:

Task Schedule contains all imported, upcoming tasks—colored-coded categories with mark-as-done boxes. Ability to filter by certain parameters. AI suggestions on when to complete tasks based on priority and number of tasks.
